

Royal Hill Greenwich, London

A dingy and dilapidated cottage in Greenwich was completely refurbished to create a contemporary open plan light box.

The low roof void was also transformed to create a study with access from the master bedroom revealing unseen views of Greenwich and Canary Wharf.

The entire fabric was upgraded beyond current building regulation requirements to improve the thermal performance with only the 1st floor structure and staircase retained.

A side extension was added to create an open plan kitchen/family room with a raised ceiling height and fineline open corner door to access the rear garden

The complete project was undertaken in 16 weeks.
